EDUCATION

Ramaiah Institute of Technology

Bangalore, India

B.E. in Computer Science and Engineering (CGPA: 9.06)

2023 – 2027

Shiksha Niketan Senior Secondary School

Jammu, India

Class 12 (Percentage: 96.4%)

2022

TECHNICAL SKILLS

Languages/Frameworks: C++, Python, Java-Script, **React**, **Node.js**, **Express.js**, **RestAPIs**, **Next.js**

Tools: Git/Github, Docker, Postman, Cursor, Canva, **MongoDB**, **SQL**, **CICD**, **AWS**

Coursework: DSA, OOP, Operating Systems, DBMS, Computer Networking

AI: ML, LLMs, GenAI, langChain, n8n, RAG, VectorDB

EXPERIENCE

MSRIT | *Intern (On-site)*

Aug. 2024

Developed multiple web applications using the MERN stack, including several small-scale projects to enhance development proficiency. Built a full-stack e-commerce platform with integrated frontend and backend functionality.

Web Development Intern

June 2024 – July 2024

Unified Mentor Pvt. Ltd.

- Built and deployed multiple web applications including a To-Do application and a Gym Management System to strengthen full-stack development skills
- Completed daily development tasks via company portal
- Worked on small-scale feature implementations and bug fixes across internal projects

PROJECTS

Attainers 📄 | *React, Node.js, Express, MongoDB, Clerk, Tailwind*

2025

- Built a MERN-based learning platform (courses, tests, PDFs, PYQs, blogs) with scalable **REST APIs**
- **Developed a mock test engine** with timer, negative marking, real-time evaluation, and persistent user analytics
- **Implemented role-based admin dashboard** with Clerk authentication, full CRUD + media pipelines, and backend systems including **PDF-to-test parsing**, secure file delivery, and cron-based jobs

Ankur School (Management System) 📄 | *React, Node.js, Express, MongoDB, JWT, Tailwind*

2025

- Built a full-stack MERN-based school management system handling admissions, payments, content, and student records with scalable REST APIs
- **Implemented secure authentication system** using JWT with role-based access control for admin workflows and protected routes
- **Designed end-to-end admission & payment pipeline** integrating PhonePe gateway, webhook handling, and automated student onboarding with MongoDB and GridFS-based file storage

Disaster Prediction ML Platform 📄 | *React, Scikit-Learn, Pandas, Tailwind,*

2025

- Built a full-stack ML platform predicting earthquakes, floods, and forest fires using historical data with a React frontend
- **Developed ML models** (Random Forest, classification) with feature engineering, train-test pipelines, and model serialization for real-time inference
- **Designed end-to-end prediction pipeline** serving preloaded models, dynamic input handling, and real-time predictions via REST integration

ACHIEVEMENTS & POR

Honors & Awards: CTF (MSRIT) 26: **Runner-up (2nd Position)**; TECH CHRONICLES: **3rd Position**

Coding: Solved **300+** problems across [LeetCode](#), [GeeksforGeeks](#), and [Coding Ninjas](#)
